

## Option 2

In the formula below, I encoded in mathematical terms the main goal of my games:

$$\text{RAP} = 4\text{P} + \text{MUVI}$$

Cue: It is a literary sentence I encrypted into a math formula. I could literally convert the formula back to the one sentence to mean the goal of my games by using every letter and number of the formula in the same order as the initial of every word used to form the one sentence goal of my games. Decode it.

**Option 3:** The name of the creator of this game is encoded in the crossword picture below . Find the name.
